

# BDI-100/80 blower interface standard

Controlled interface specification · Rev B

|                                |                           |
|--------------------------------|---------------------------|
| Rectangular inlet              | 100 × 60 mm internal      |
| Circular outlet                | Ø80 mm internal           |
| Inlet flange envelope          | 116 × 76 mm               |
| Outlet flange outside diameter | Ø96 mm                    |
| Sealing bead                   | 2.0 mm wide × 1.0 mm high |
| Permitted mould-release draft  | 1.5° to 2.0°              |
| Maximum transition half-angle  | 15°                       |
| Minimum interface separation   | 90 mm                     |

*Interface dimensions are controlled. Duct wall and reinforcement remain designer-owned.*
